

# ADMISSIONS 2023-24

## M.Sc. ENVIRONMENT MANAGEMENT

### University School of Environment Management (DST-FIST 1)

GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY, GOVT. OF NCT OF DELHI, NEW DELHI  
(NAAC ACCREDITED 'A++' GRADE)

## Mission

*To provide trained professionals to the society and industry who could provide solutions to the problems related to resources depletion and environment degradation by harmonizing the traditional wisdom and the state of art technologies with suitable policy measures.*

## University Profile

Guru Gobind Singh Indraprastha University is a dynamic, growth-oriented university established by the Delhi government. The act of establishment came into effect on July 28, 1998, following assent from His Excellency, the President of India. The university aims to focus on professional education in growing disciplines of higher education as an affiliating and teaching institution. It fosters and promotes study, research, and professional education in engineering, environmental sciences, technology, management studies, medicine and law, among other fields. The university aspires for excellence in these fields by preparing students to be competent professionals with the finest career opportunities to address society's expanding global and industrial needs.

## M.Sc. Environment Management

The University School of Environment Management offers a two-years Master's degree course in Environment Management. It aims to equip the budding environmental managers with a comprehensive understanding of the key environmental issues, and use of a wide range of environmental tools, methods and systems so that they can play leading role in the development and application of environmental policies and management in the public and private sectors. The curriculum is designed and revised with continuous feedback from various eminent experts from Universities, Research Institutions and Industries.

## Course Objectives:

The four-semester course consists of an optimal amalgamation of theory and practice. First three semesters are devoted to course work and the final semester is dedicated to dissertation. In-depth and comprehensive knowledge about ecosystem functions, services, pollution management, environmental impact assessment, restoration, climate change, environmental policies and regulation. Students are also provided the opportunity to undergo practical training during their summer vacations. Overall, the programme trains students as environmental professionals well-equipped to work in different sectors.

Environmental Professionals are in great demand in all these sectors.
