Job Description - Software Engineer

Quhu is hiring!!!

Are you interested in working for a growing and progressive organisation? Are you looking for a mobile development position that will not only challenge you professionally but also provide a good work/quality of life balance, in a startup-like atmosphere, with other young talented individuals? Then ***Quhu is the place for you!***

We are looking for an Android developer responsible for the development and maintenance of applications aimed at a vast number of diverse Android devices. Your primary focus will be the development of Android applications and their integration with back-end services. You will be working alongside other engineers and developers working on different layers of the infrastructure. Therefore, commitment to collaborative problem solving, sophisticated design, and creating quality products is essential.

Responsibilities:

- Translate designs and wireframes into high-quality code.
- Design, build and maintain high performance, reusable, and reliable Java code.
- Ensure the best possible performance, quality, and responsiveness of the application.
- Identify and correct bottlenecks and fix bugs.
- Help maintain code quality, organisation, and automatization.

Skills:

- Working knowledge of Java and rest API's. Spring boot framework preferred.
- Familiarity with RESTful APIs to connect Android applications to back-end services
- Strong knowledge of Android UI design principles, patterns, and best practices
- Experience with offline storage, threading, and performance tuning
- Knowledge of the open-source Android ecosystem and the libraries available for common tasks.
- Ability to understand business requirements and translate them into technical requirements
- Familiarity with cloud message APIs and push notifications
- A knack for benchmarking and optimization
- Understanding of Google's Android design principles and interface guidelines.

Must-Have:

- Experience in making android applications in Kotlin.
- MVVM architecture.
- Proficient in making complex UI's.
- Proficient understanding of code versioning tools, such as Git.
- Java/Kotlin.

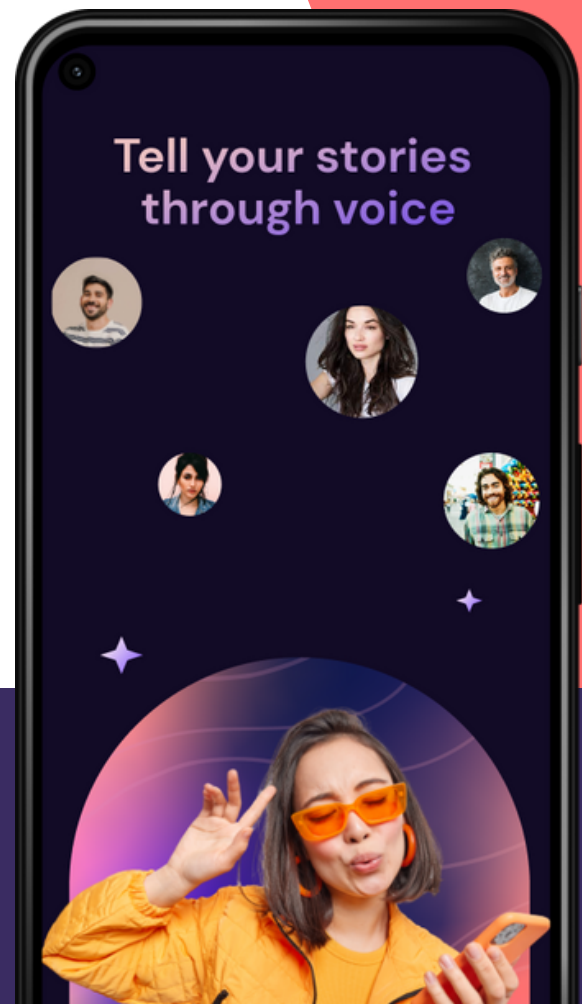

CTC 4 - 6 LPA and ESOPS Additional.
