About Company - Binmile is a software engineering company that helps businesses across the globe expand their digital success and develop successful software solutions. An ISO-certified company that has been recognized as the 13th fastest-growing company in India by Deloitte in 2022.

A leading digital strategy and product engineering company that has developed digital products and provides custom market-leading solutions for 200+ global Independent Software vendors (ISVs), Fortune 500 enterprises, and SMBs from the High Tech, BFSI, Healthcare, Education, E-Commerce, and Manufacturing businesses.

Job Title: Software Developer

Job Summary:

We are looking for highly motivated and talented Fresher Software Developers to join our dynamic team. As a Fresher Software Developer, you will have the opportunity to learn and contribute to various software development projects. You will work closely with experienced developers and be involved in different stages of the software development lifecycle, gaining valuable hands-on experience, and building a strong foundation in software development.

Responsibilities:

1. Learn and understand the company's software development processes, methodologies, and coding standards.
2. Assist in the design, development, testing, and deployment of software solutions under the guidance of senior developers.
3. Collaborate with the development team to analyse project requirements and contribute to technical discussions and decision-making.
4. Write clean, well-documented, and efficient code in accordance with established coding standards and best practices.
5. Conduct thorough testing and debugging of software applications to identify and fix issues or bugs.
6. Assist in the maintenance and enhancement of existing software systems.
7. Learn and utilize software development tools, frameworks, and technologies employed by the company.
8. Keep up to date with emerging technologies, programming languages, and industry trends to enhance your skills and knowledge.
9. Work collaboratively with team members to contribute to the success of projects and meet project deadlines.
10. Demonstrate a willingness to learn and adapt to new technologies and programming languages as required.

Qualifications:

1. Bachelor's degree in computer science, Software Engineering, or a related field.
2. Strong passion for software development and eagerness to learn and grow as a developer.
3. Basic understanding of programming concepts and familiarity with at least one programming language (e.g., Java, HTML, CSS, JavaScript, Python, C#, etc.).
4. Understanding of Database management system.
5. Knowledge of data structures and algorithms.
6. Solid problem-solving and analytical skills.
7. Good communication and interpersonal skills, with the ability to work well within a team.
8. Familiarity with version control systems (e.g., Git) and basic software development tools.
9. Any relevant coursework, projects, or internships completed during education is a plus.

Location: Noida

Job Description: ServiceNow Developer (Freshers)

Job Title: ServiceNow Developer

Job Type: Full-time

Location: Noida

Job Summary: We are seeking talented and enthusiastic individuals to join our team as ServiceNow developers. As a ServiceNow developer, you will be involved in the design, development, testing, and deployment of software solutions. This is an excellent opportunity for fresh graduates who are passionate about coding and want to kickstart their careers in the software development field.

Key Responsibilities:

1. Collaborate with team members to analyse requirements and design software solutions.
2. Write clean, efficient, and maintainable code following best practices and coding standards.
3. Participate in the full software development lifecycle, including requirements gathering, design, development, testing, and deployment.
4. Debug and fix defects or issues in the software, ensuring high quality and optimal performance.
5. Perform unit testing to validate the functionality and integrity of the code.
6. Learn and utilize development tools, frameworks, and technologies relevant to the project.
7. Collaborate with cross-functional teams to ensure seamless integration and interoperability of software components.
8. Stay updated with emerging trends and technologies in the software development field.
9. Document code, technical specifications, and processes for future reference and knowledge sharing.
10. Contribute to team discussions, share ideas, and provide suggestions for process improvements.

Qualifications and Skills:

1. Bachelor's degree in Computer Science, Software Engineering, or a related field.
2. Strong knowledge in any programming languages such as Java, C++, Python, or JavaScript.
3. Familiarity with software development principles, methodologies, and best practices.
4. Understanding of data structures, algorithms, and database concepts.
5. Knowledge and Proficiency using SQL language.
6. Proficiency in using development tools, integrated development environments (IDEs), and version control systems.
7. Good problem-solving skills and attention to detail.
8. Excellent communication and teamwork abilities.
9. Self-motivated with a strong desire to learn and grow in the software development domain.
10. Familiarity with web development technologies (HTML, CSS, JavaScript) is a plus but not mandatory.
11. Previous experience or internships in software development projects is a plus but not required.

Note: This job description provides a general overview of the responsibilities and requirements for the Developer role. Additional tasks may be assigned based on organizational needs and the candidate's capabilities.

We offer a supportive and collaborative work environment, opportunities for professional growth and development, and exposure to diverse projects. If you are a passionate and dedicated individual who enjoys coding and wants to contribute to the success of our team, we would love to hear from you.
