Job Description:

Purpose: For Building & Construction SBU, we are looking for talented and self-driven graduate civil engineers for working in field of waterproofing of mega and large civil engineering dams, tunnels and building projects. If you are a highly motivated professional and passionate to learn about most contemporary technologies in the field of civil engineering, we would like to hear from you. You will a member of our commercial team and play a pivotal part in ensuring that quality standards are maintained on our waterproofing projects , mainly tunnels and sub-structures.

Opportunity:

- Work with well establish Industrial Group with proven track record of building successful businesses.
- Group compliance with ISO 9001; ISO 14001; ISO 45001 and IATF certification, compliances and approvals.

Responsibilities

- Ensure compliance with specifications and ensure materials are installed as per agreed specifications, overall project management and coordination
- Assist in monitoring project budgets and resources
- Maintain accurate project documentation and reporting
- Build and maintain relationships with client, PMC and general contractor at various levels
- Ensure safety and environment compliance on job sites
- Provide feedback for improvement in existing process and procedures
- Manage application team of waterproofing work at tunnel site.
- Record, maintain and share daily and weekly progress reports.
- Coordination with Head office, MFG plants and client.
- Manage technical approvals by coordinating with Project Management Consultants.
- Manage and control all inventory, orders, supplies and application work at project site
- Strong problem solving skills
- Excellent communication and team work abilities
